

pinot grigio perfected
exclusively ours

Several years ago, we made a wonderful discovery in our California Tehachapi Vineyard—a naturally occurring white Pinot Grigio, unlike the usual reddish-gray color. We propagated this unique clone to produce a Pinot Grigio wine of

uncompromising taste and integrity with more intense natural flavor. Our wine tastes fresher and crisper and will be the new benchmark for quality in this varietal. Pinot Grigio Tehachapi Clone—only from Forest Glen. Enjoy!

FOREST GLEN.
